Education

Zhejiang University

Hangzhou, China

Prospective M.S. in Electronic Information

Sept 2027 – June 2030

- Provisionally admitted through recommended admission.
- Research direction: Advanced IC Manufacturing. Advisor: Prof. Yunlong Li.

Nanjing University of Posts and Telecommunications

Nanjing, China

B.Eng. (expected) in Electronic Science and Technology

Sept 2023 – June 2027

- GPA: 4.48/5.0; rank: 2/265 (top 1%).
- Selected coursework: Semiconductor Physics and Devices (98/100), Analog Electronic Circuits (97/100), Signals and Systems (98/100).

Jiangsu Province Yancheng Middle School

Yancheng, China

High School Diploma in General Education

Sept 2020 – June 2023

Publications

Neutral-Axis $\text{Ti}_3\text{C}_2\text{T}_x/\text{GO}$ Sandwich Sensor with Bending Immunity and

Apr 2026

Deep Learning Tactile Recognition

Research Projects

Flexible Sensor and Deep Learning Tactile Recognition

NJUPT

- Fabricated MXene/GO sandwich sensors and performed SEM, XRD, and Raman characterization, together with electromechanical testing.
- Investigated bending interference and tactile recognition using a neutral-axis sensor design and a 1D convolutional neural network.
- Contributed to experimental analysis and manuscript preparation; published in Sensors.

2024 – 2026

Selected Awards

2023, 2024: First-Class University Scholarship, NJUPT

2024: First Prize, National College Mathematics Competition (Non-Mathematics, Category A)

International Study

Cambridge Kunpeng Program

Cambridge, UK

Short-term study at the University of Cambridge in artificial intelligence and robotic automation, supported by a full Jiangsu provincial scholarship.

Aug 2025

Languages

Chinese: Native

English: Fluent; CET-4 617/710, CET-6 613/710

Research Interests

Advanced IC manufacturing and semiconductor processing; flexible sensing; AI agents and scientific computing.
