NJUPT, Xianlin Campus, 9 Wenyuan Road, Nanjing, Jiangsu, China, 210023

PROFESSIONAL SUMMARY

Final-year undergraduate in Electronic Science and Technology at NJUPT, with provisional admission to ZJU's master's program. My research interests include advanced IC manufacturing, semiconductor processing, and flexible sensing. I also explore AI agents and scientific computing through hands-on projects.

EDUCATION

Zhejiang University | 2027-09 - 2030-06

Prospective Master's Student · Electronic Information | Hangzhou, China

Expected study period: Sep 2027 - Jun 2030.

Research focus: Advanced IC Manufacturing.

Prospective advisor: Prof. Yunlong Li.

Provisionally admitted through recommended admission.

Nanjing University of Posts and Telecommunications | 2023-09 - 2027-06

Undergraduate · Electronic Science and Technology | Nanjing, China

Currently in the final year of undergraduate studies.

Expected graduation: Jun 2027.

Jiangsu Province Yancheng Middle School | 2020-09 - 2023-06

High School · Senior Secondary Education | Yancheng, China

AWARDS

2024 · **First-Class University Scholarship**, NJUPT

2023 · **First-Class University Scholarship**, NJUPT

PUBLICATIONS

Neutral-Axis $\text{Ti}_3\text{C}_2\text{T}_x/\text{GO}$ Sandwich Sensor with Bending Immunity and Deep Learning Tactile Recognition

Jiahao Qi, Tianshun Gong, and Debo Wang. *Sensors*, 26(8), 2471, 2026. DOI: 10.3390/s26082471.

PROJECTS

Flexible Sensor and Deep Learning-Based Tactile Recognition | 2024 - 2026

Research project at NJUPT on a neutral-axis $\text{Ti}_3\text{C}_2\text{T}_x/\text{GO}$ sandwich sensor for tactile sensing with reduced bending interference.

Contributed to data curation, formal analysis, and manuscript preparation.

The project resulted in a publication in *Sensors* in 2026.

CERTIFICATES

Cambridge Kunpeng Program - Artificial Intelligence and Robotic Automation | 2025

University of Cambridge

Completed a short-term program with full funding through a Jiangsu provincial scholarship.

LANGUAGES

Chinese: Native · English: Fluent

INTERESTS

Semiconductor devices and advanced IC manufacturing; Flexible electronics and intelligent sensing; AI agents and scientific computing.
